Introducing Civil Engineering, Infrastructure and Enabling Works 2026

Creating the infrastructure for tomorrow.

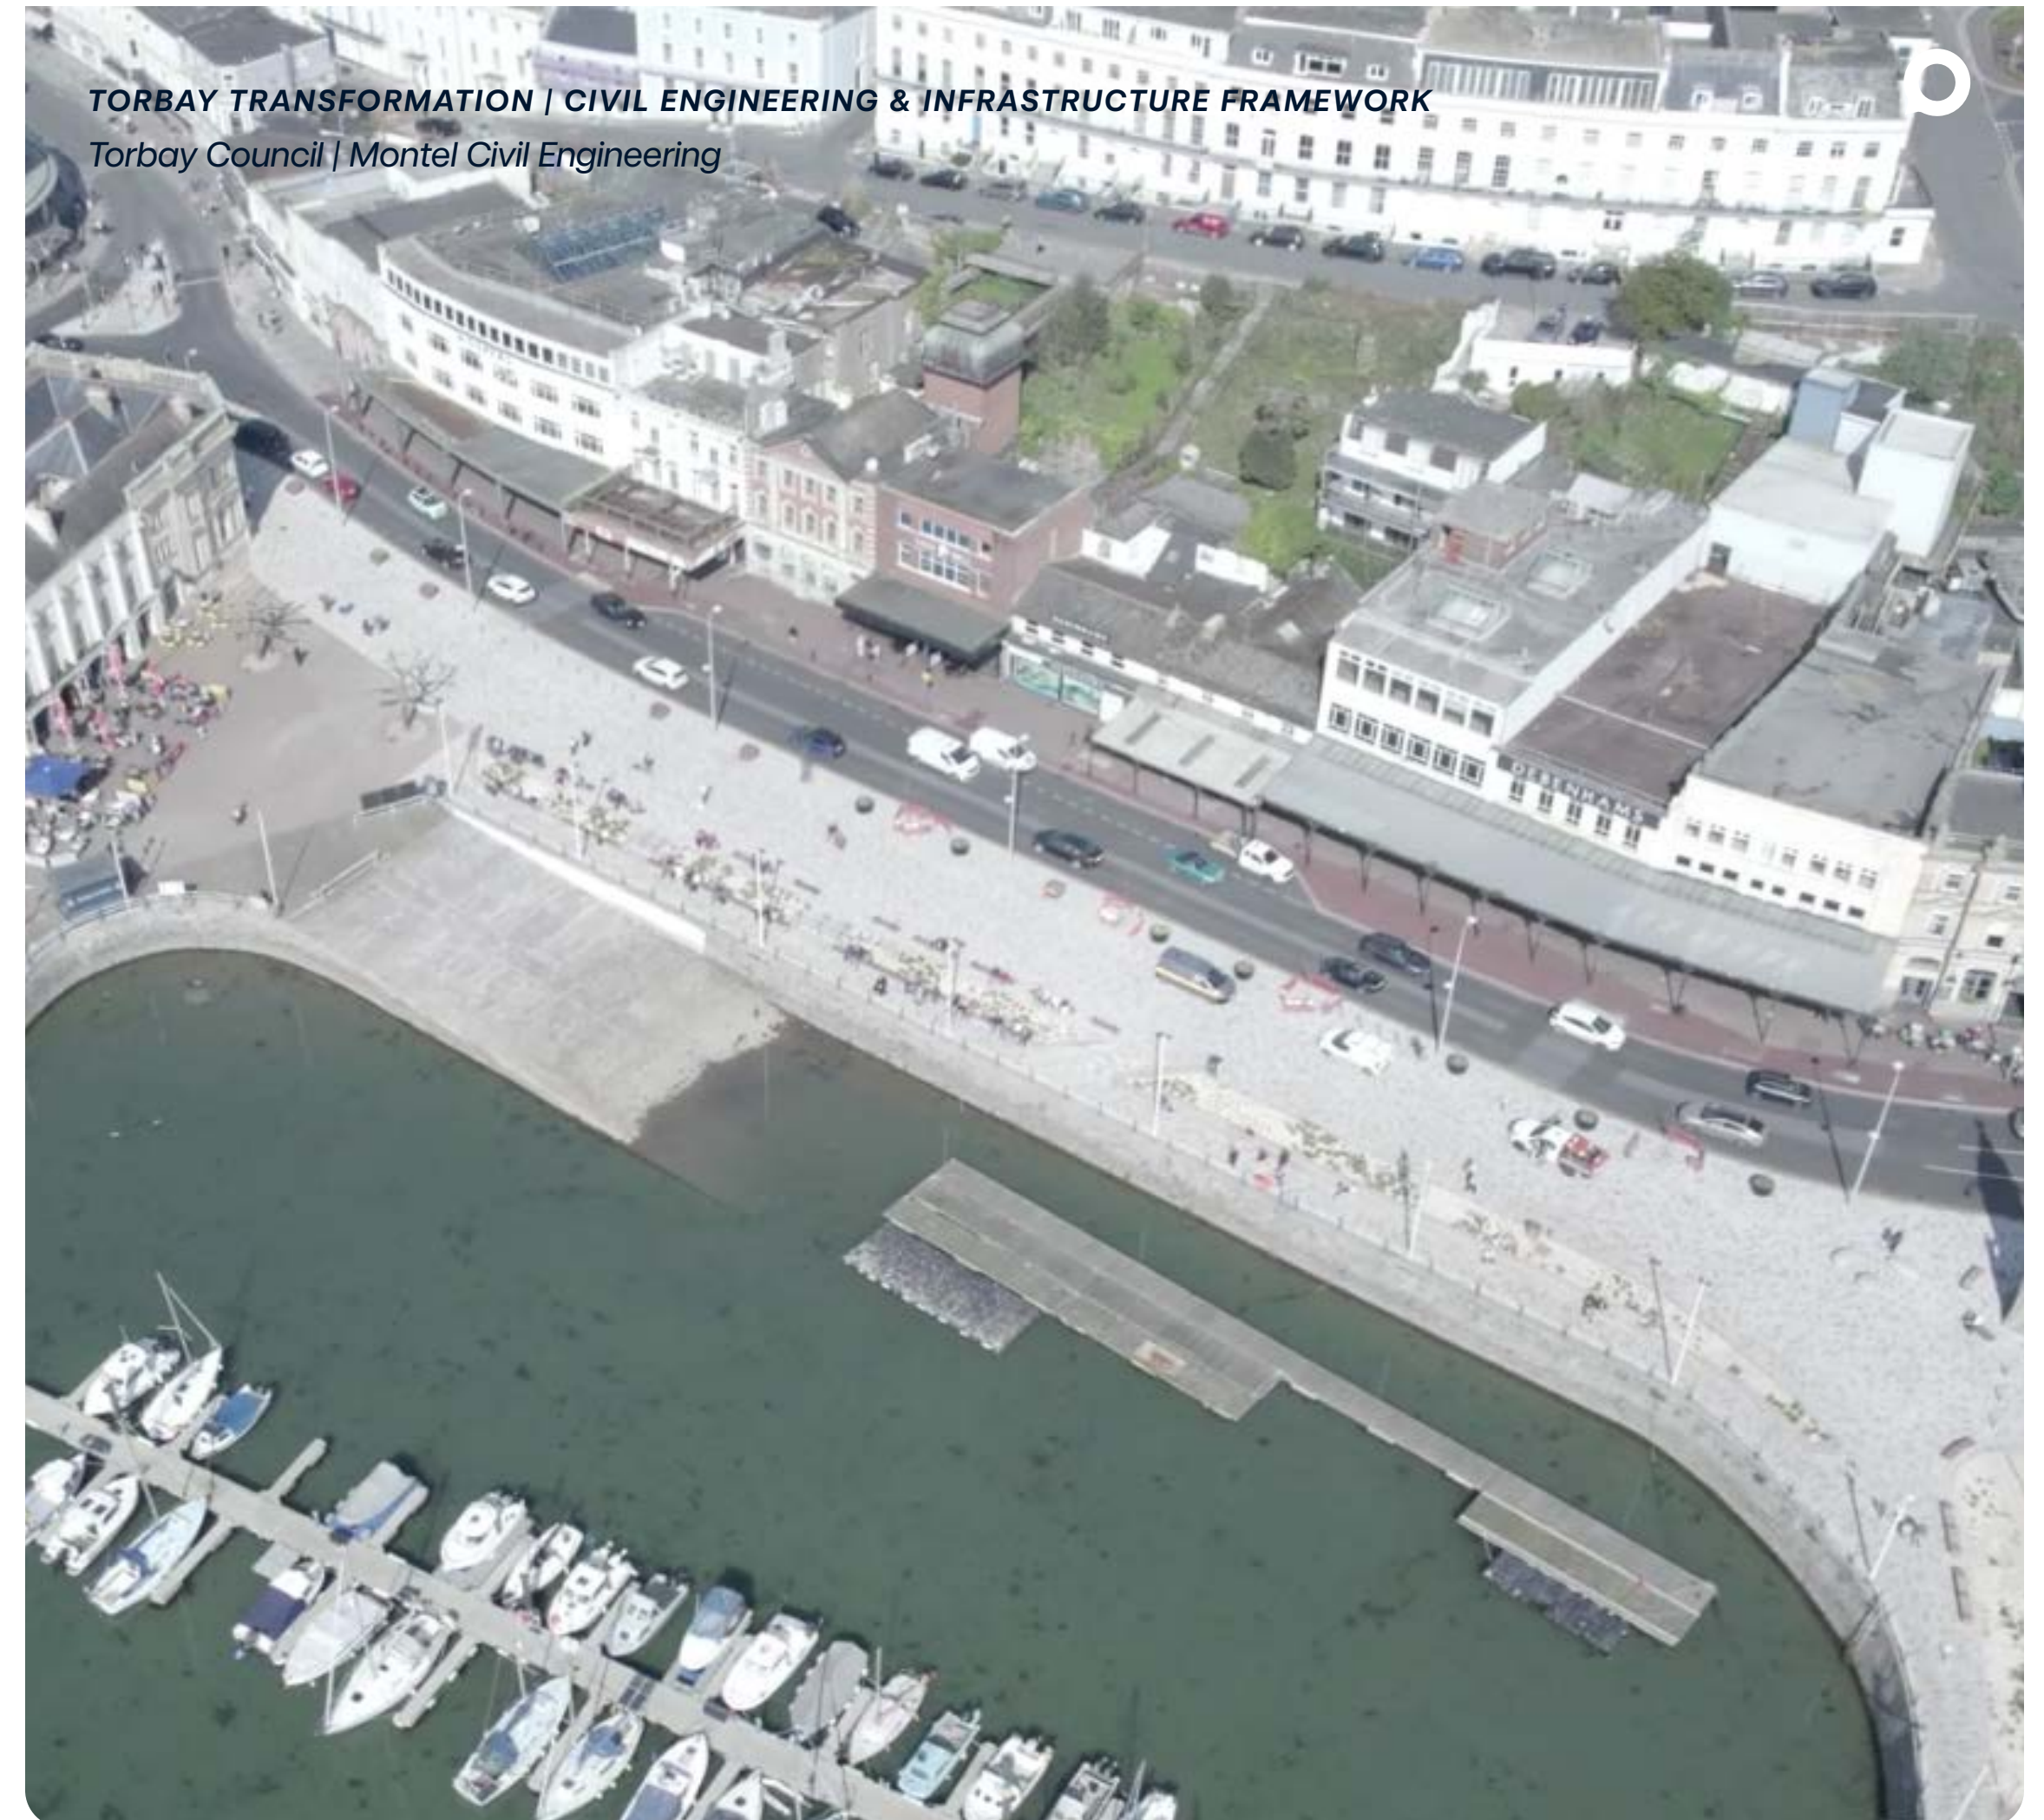

Public sector organisations delivering vital infrastructure must balance cost, pace, risk and compliance while creating lasting community value.

The Civil Engineering, Infrastructure and Enabling Works Framework provides a compliant, flexible route to market for infrastructure projects of all sizes, supporting economic growth, connectivity and resilience across the UK.

With government priorities focused on growth, social value and regional prosperity, the framework helps organisations deliver infrastructure that meets today's needs and enables tomorrow's opportunities.

This guide helps you:

- ✓ Understand what the framework covers
- ✓ Choose the right procurement route for your project
- ✓ Run compliant call-offs under the Procurement Act 2023
- ✓ Access pre-qualified suppliers across every region and value band

TORBAY TRANSFORMATION | CIVIL ENGINEERING & INFRASTRUCTURE FRAMEWORK
Torbay Council | Montel Civil Engineering

YPO is the Contracting Authority for the Civil Engineering, Infrastructure and Enabling Works 2026. Pagabo is appointed as Managing Agent to run and administer the framework on YPO's behalf, ensuring compliant use under the Procurement Act 2023.

Civil Engineering, Infrastructure and Enabling Works 2026 overview

Why choose this framework?

- ✓ Proven delivery model: a second-generation Civil Engineering, Infrastructure and Enabling Works Framework
- ✓ A wide range of quality national and regional contractors
- ✓ Feasibility studies included in the framework scope
- ✓ Fully compliant with the Procurement Act 2023
- ✓ Three flexible call-off routes
- ✓ Specialist procurement support from your local team
- ✓ Social value built in — jobs, skills and local spend
- ✓ Free access to Pagabo software for client organisations
- ✓ Use it for a single project or a full programme of works

FRAMEWORK FACTS

Contracting Authority	YPO
Term	Oct 2026 to Oct 2030
Project values	£Unrestricted
Total capacity	£5bn over four years
Lots	13 lots
Suppliers	44 National, 67 Regional

WHO CAN USE IT

Available to all UK public sector organisations, including local authorities, NHS trusts, housing associations, education, blue light, central government, defence, energy and utilities, and transport authorities.

The Framework can also be used by private sector organisations.

Local impact you can evidence

Jobs, skills and opportunity — in every postcode.

Public money is increasingly expected to do two jobs at once: deliver the infrastructure and build the local economy around it.

Civil Engineering, Infrastructure and Enabling Works 2026 is set up for that. Social value is assessed when suppliers join the framework, and again at every call-off — so commitments are real by the time they reach your project.

CIVIL ENGINEERING, INFRASTRUCTURE AND ENABLING WORKS 2026 FOCUSES ON

- ✓ Good jobs, fair pay and fair working conditions
- ✓ Apprenticeships, qualifications and work placements
- ✓ Helping young people who are not in education, employment or training into work
- ✓ Opportunities for people facing barriers to employment
- ✓ Local and smaller suppliers in the supply chain
- ✓ Health and wellbeing in the workforce

£6.2bn of social value and economic impact enabled through Pagabo frameworks to date.

MEASURED AND REPORTED

Every supplier records social value against your project through our social value platforms, at no cost on Pagabo-procured projects. You get reports at feasibility stage, at contract start and at completion, so you can show what your investment delivered, and use it in your own reporting.

From January 2027 social value is weighted at 20% on contracts over £5m. The reporting is ready now.

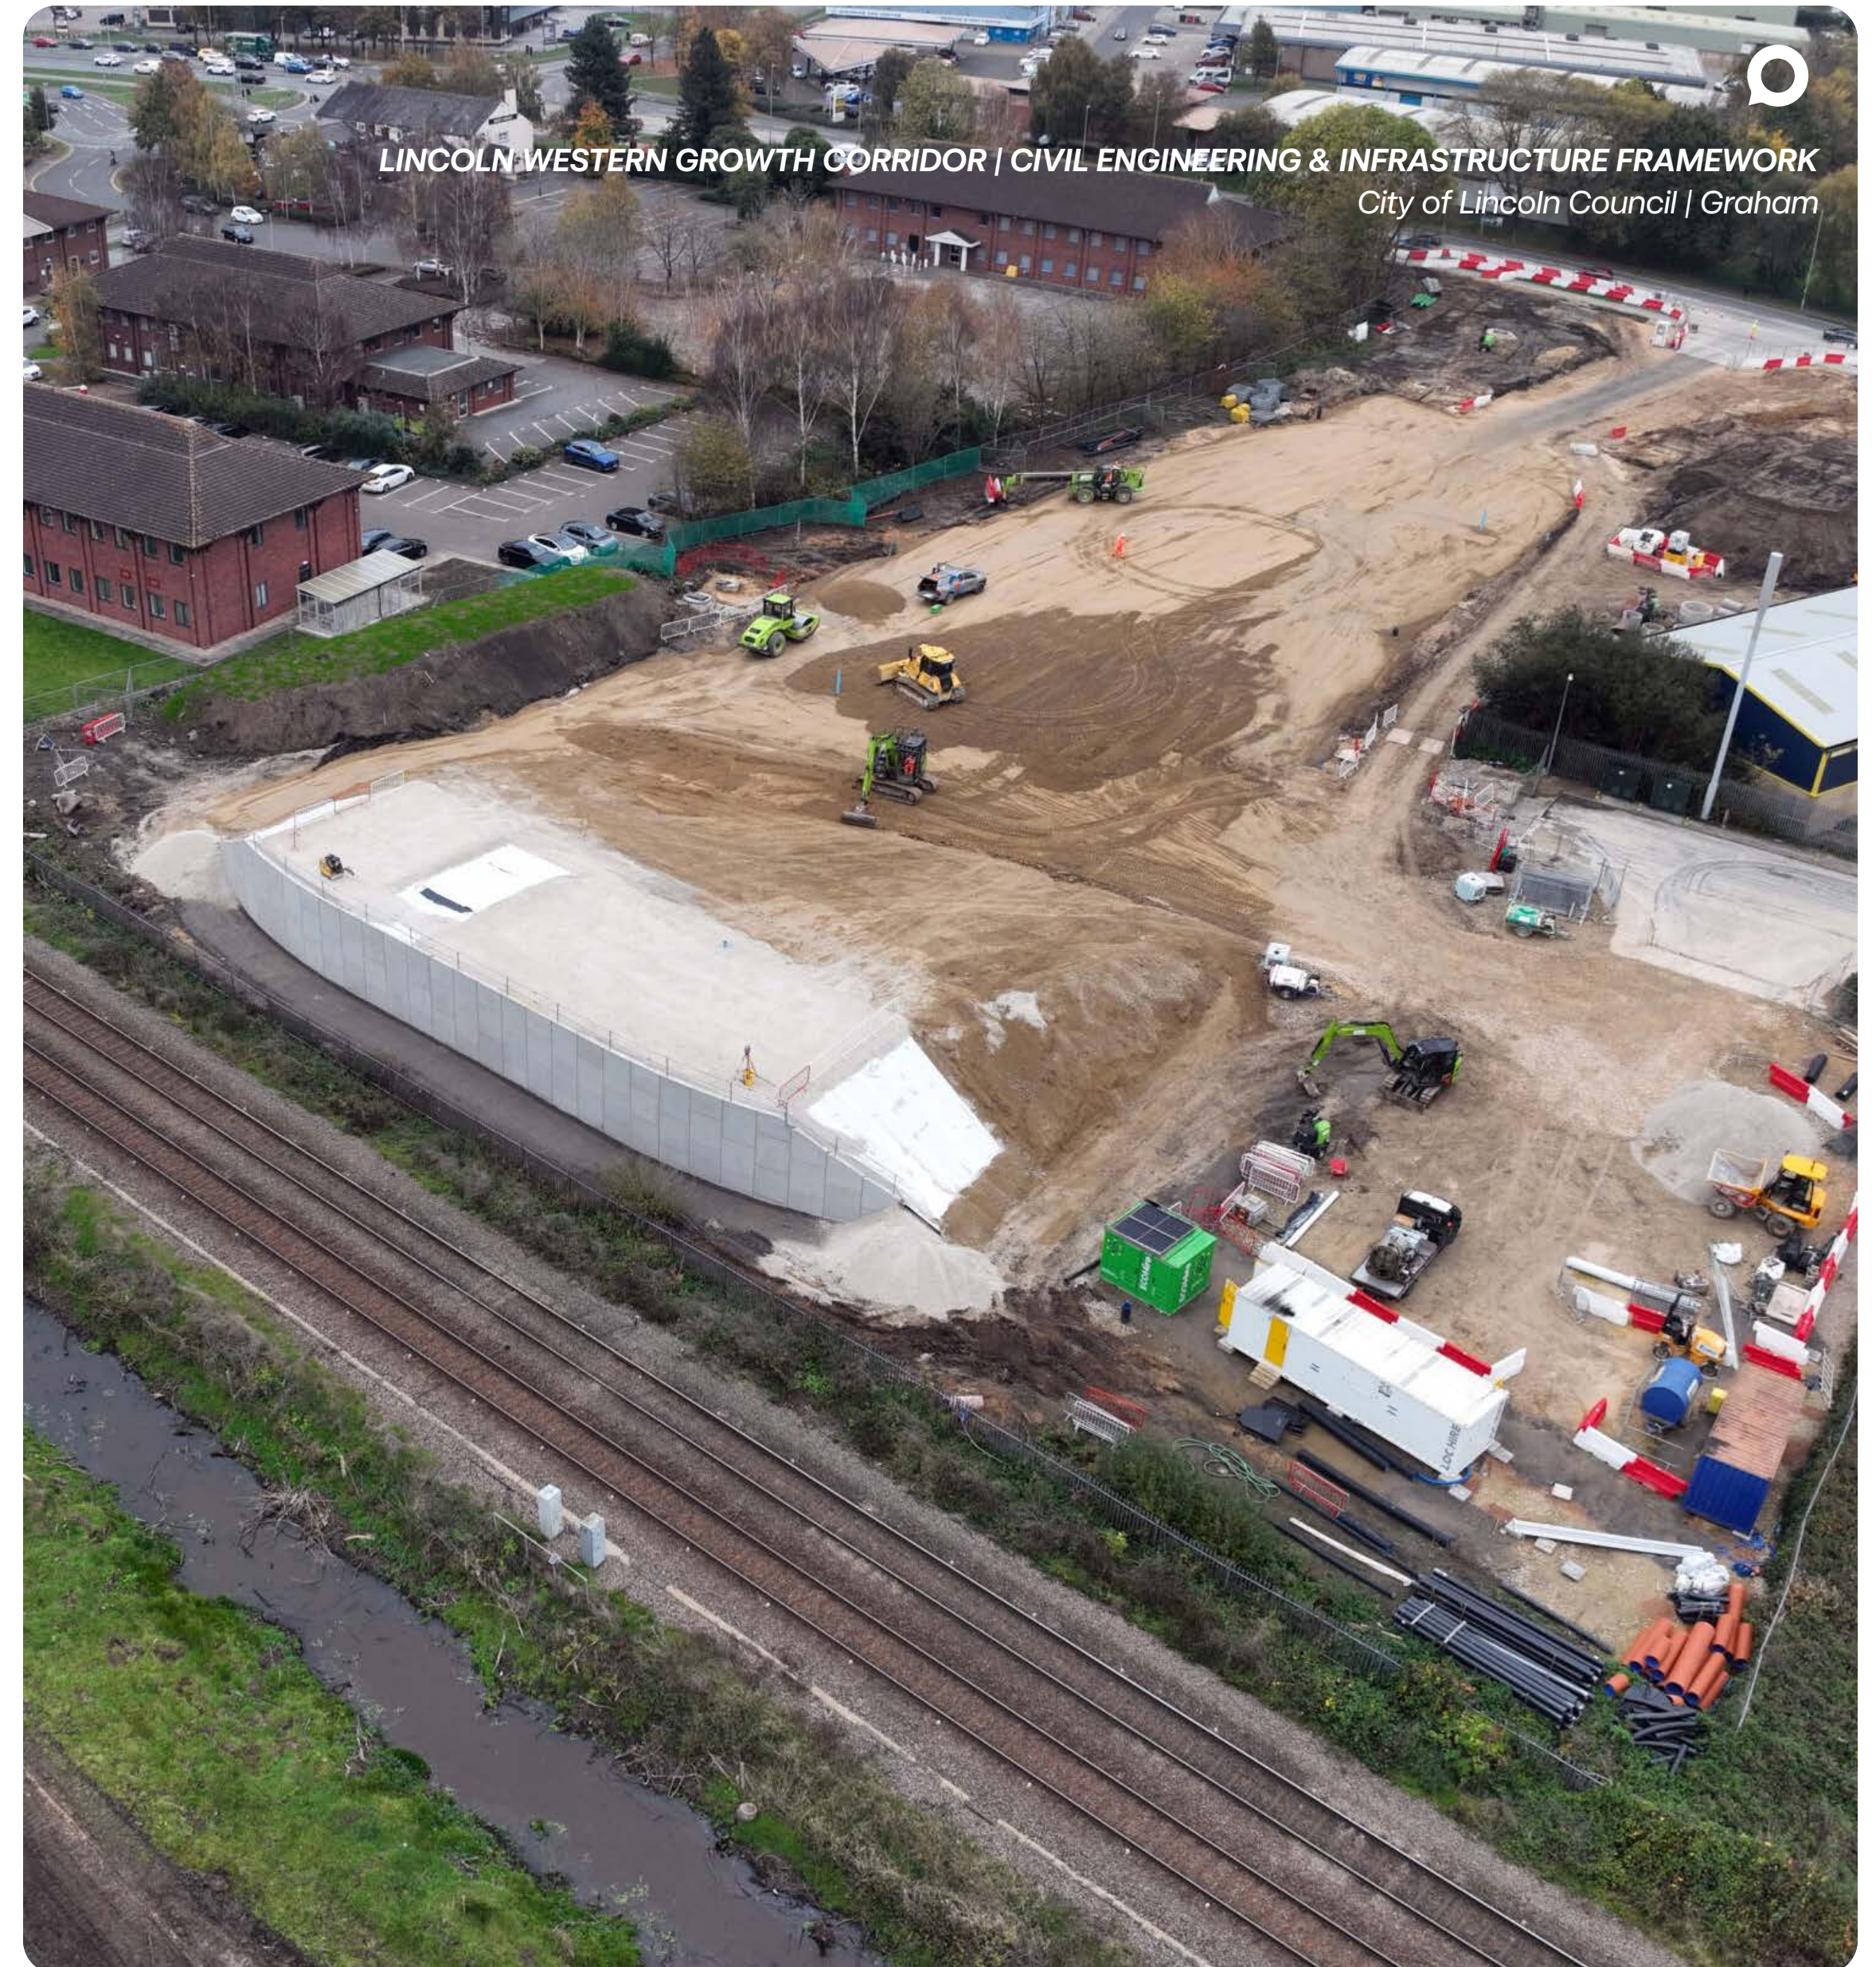

Delivering better outcomes **through public procurement**

Pagabo is a public procurement specialist. We help the public sector buy faster and better, and make sure that spending creates lasting value for communities.

More responsibility for building is moving to councils and combined authorities, often at a time when in-house procurement and technical teams are stretched. Civil Engineering, Infrastructure and Enabling Works 2026 gives you that capacity without having to build it yourself.

WHY ORGANISATIONS CHOOSE PAGABO

- ✓ Simpler, faster procurement
- ✓ Better value for money
- ✓ Trusted, high-performing suppliers
- ✓ Less risk, full compliance
- ✓ Real jobs, skills and local growth

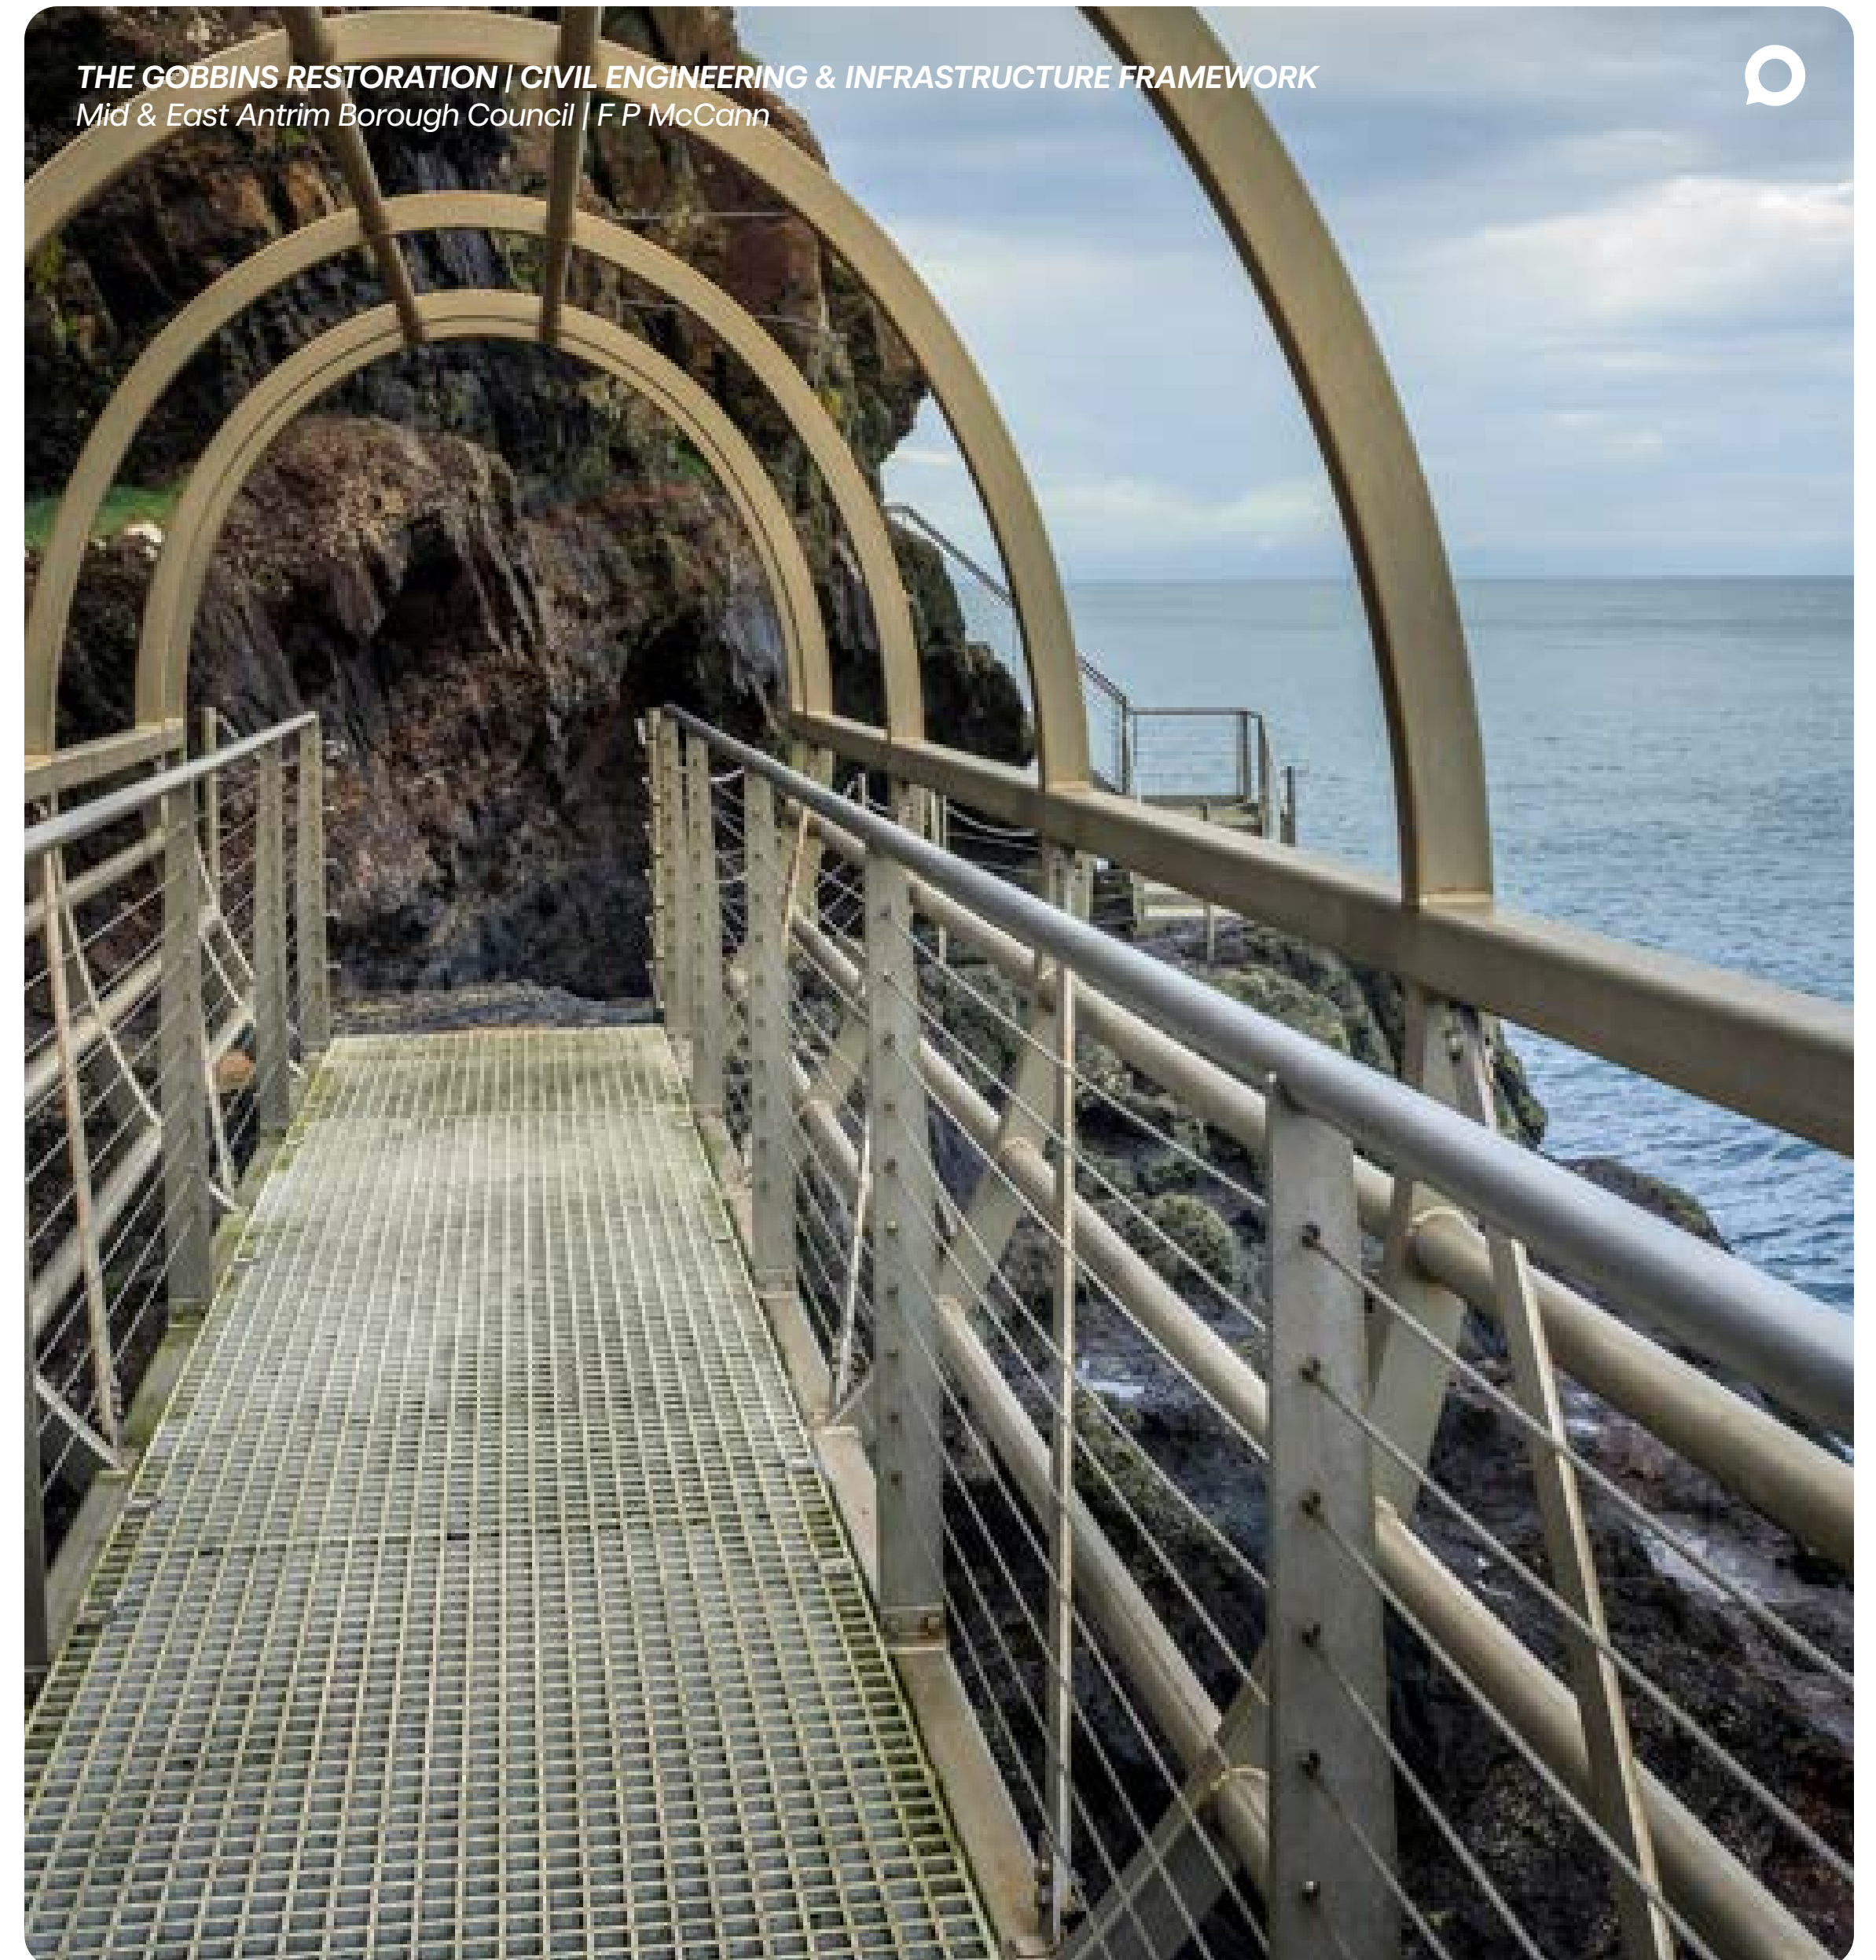

Supporting you from strategy to delivery

We work alongside you to shape your procurement strategy, guide decisions and support delivery — so procurement leads to better projects, better commercial outcomes and real community benefit.

WHAT WE DO WITH YOU

- ✓ Build procurement strategies that fit your project and the market
- ✓ Advise on the best route to market and supplier selection
- ✓ Support your governance, assurance and audit needs
- ✓ Run your call-off tender process for you
- ✓ Manage supplier engagement and performance
- ✓ Build in social value, sustainability and local priorities
- ✓ Provide ongoing support from dedicated procurement specialists

Built for the Procurement Act 2023

Compliance evidence is created as you go, not chased afterwards.

Civil Engineering, Infrastructure and Enabling Works 2026 is designed and run in line with the Procurement Act 2023, supporting transparent, proportionate and accountable procurement.

THIS INCLUDES:

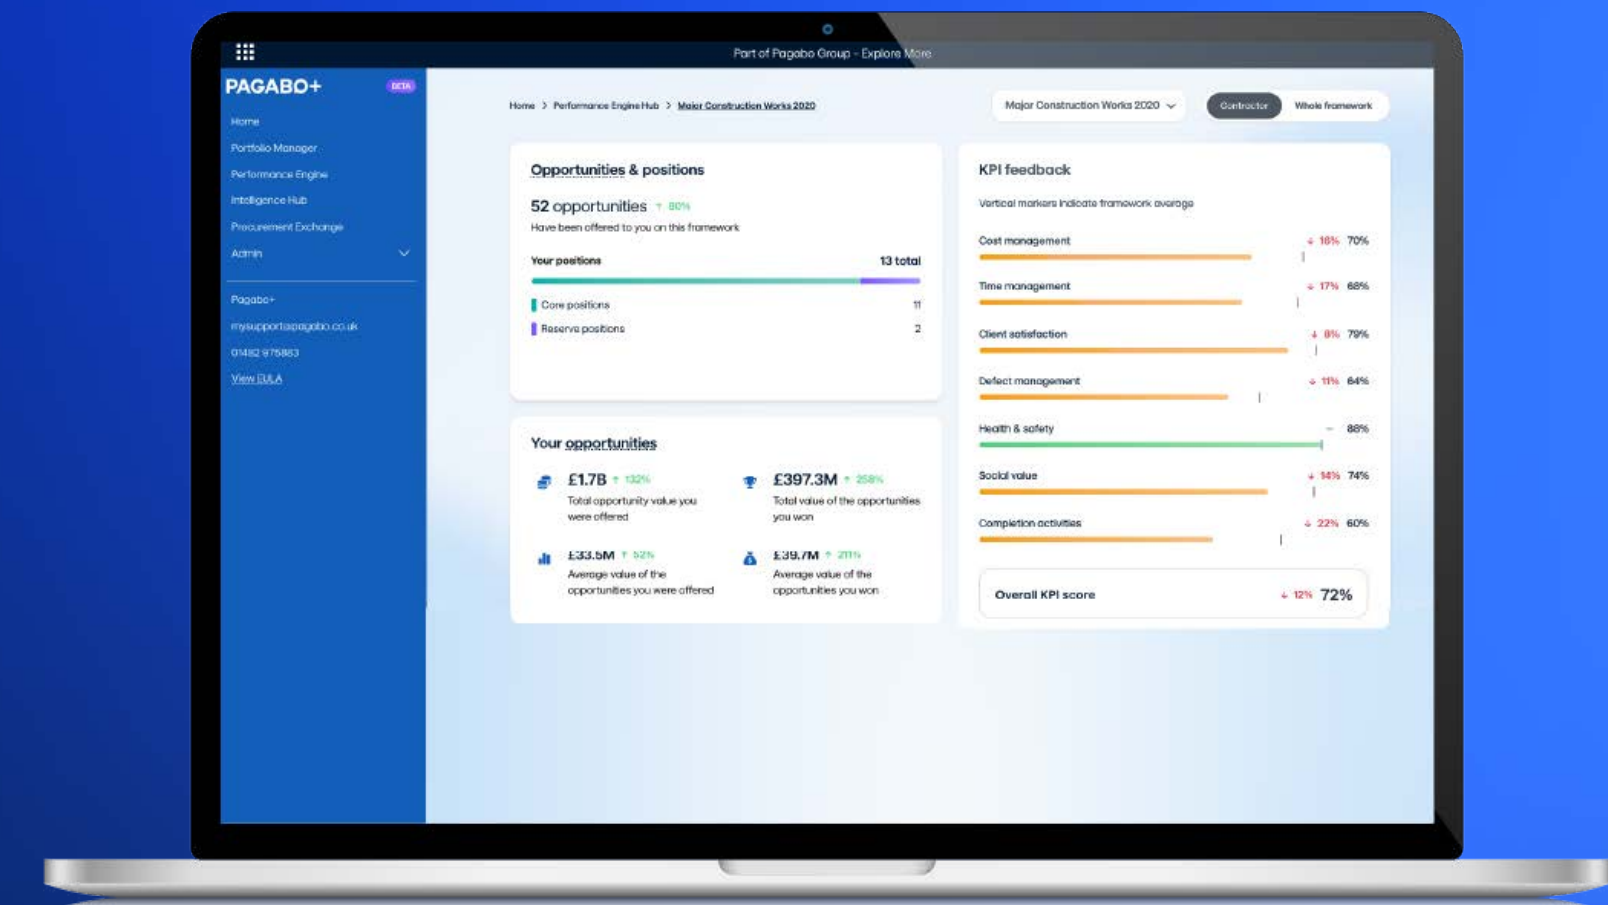

- ✓ Transparent processes, captured digitally end to end
- ✓ A digital audit trail for every call-off, from opportunity to award
- ✓ Objective mechanisms for choosing suppliers
- ✓ Fast, compliant call-off processes
- ✓ Competition that is proportionate to the project
- ✓ Clear accountability and governance

PAGABO+

THE OPERATING SYSTEM FOR CIVIL ENGINEERING,
INFRASTRUCTURE AND ENABLING WORKS

All framework activity runs through Pagabo+, giving you PA23 compliance and procurement efficiency by default.

Publish opportunities, manage call-offs, track performance and capture the evidence you need — all in one place. Every framework supplier reports monthly through the system, so your audit trail builds itself.

WHAT PAGABO+ GIVES YOU

Project feasibility assessments · Direct engagement with framework suppliers · Structured, compliant call-offs · Real-time KPI tracking · Portfolio-wide project insight · Integrated social value measurement

More at pagaboplus.co.uk

Three ways to call off

Every project is different. Pick the route that fits yours.

Whether you need speed, targeted competition or a fully bespoke process, each route is compliant, efficient and transparent. Our team will help you choose.

01

Pagabo DirectAppoint[®]

THE FASTEST ROUTE

Appoint the right supplier without further competition, using objective framework criteria. Best where speed and certainty matter most.

Average Time: 0 to 2 weeks

02

Pagabo FastTrack[®]

TARGETED COMPETITION

A streamlined tender that keeps competition focused, balancing speed with project-specific evaluation.

Average Time: 2 to 3 weeks

03

Further Competition

FULL FLEXIBILITY

A fully tailored competitive process, single or two stage, for complex or higher-risk projects needing detailed evaluation.

Average Time: 4 to 10 weeks

Want a contractor involved early? The framework can be used to engage contractors in project feasibility assessments.

Civil Engineering, Infrastructure and Enabling Works 2026

UPO | PAGABO

Framework Structure

Civil Engineering, Infrastructure and Enabling Works 2026 is suitable for any highways, rail, water, maritime, energy, aviation, nuclear, defence, demolition, land remediation and full enabling works projects.

LOT 1 AND LOT 10 – COLLABORATIVE PARTNERS

A single supplier appointed as an integrated, long-term partner across the Framework, in one of three specialisms: Delivery, Sustainability or Quality. These can be appointed directly without competition, giving fast access to specialist expertise and early involvement that shapes design, manages risk and improves outcomes. If preferred, a competition can also be run between the 3 suppliers in Lots 1a-c and Lots 10a-c.

LOTS 2-9&11-13 LOT BREAKDOWN

Core contractors may deliver projects via DirectAppoint, FastTrack or Further Competition. Reserve contractors may be engaged on the same basis, but only where required in a further competition, to provide standby capacity and competitive tension.

Lots	Value band	Core contractors	Reserve contractors	Geographical areas
Lot 2-8	£100k - £5m	6 core (5 regional)*	3 reserve (2 regional)	12 areas
Lot 2-8	£5m – £15m	6 core (3 regional)*	3 reserve (1 regional)	7 areas
Lot 2-8	£15m – £30m	6 core (0 regional)*	3 reserve (0 regional)	7 areas
Lot 2-8	£30m +	6 core (0 regional)*	3 reserve (0 regional)	4 areas
Lot 9	£Unrestricted	6 core (0 regional)*	3 reserve (0 regional)	1 area
Lot 11-13	£0 - £500k	6 core (6 regional)*	3 reserve (2 regional)	12 areas
Lot 11-13	£500k - £1m	6 core (4 regional)*	3 reserve (2 regional)	12 areas
Lot 11-13	£1m+	6 core (2 regional)*	3 reserve (2 regional)	12 areas

*Lot 1 suppliers can also take part in further competitions'

Supplier participation

Checked before appointment. Chosen on quality first.

Every supplier on Civil Engineering, Infrastructure & Enabling Works 2026 has been independently assessed — financial standing, insurances, accreditations, capability and policies all checked — and each won its place through competitive evaluation.

CONDITIONS OF PARTICIPATION

- ✓ Financial standing and turnover — evidence of sound economic capacity
- ✓ Insurances — EL £10m, PL £10m, PI £5m, Product £2m
- ✓ Common Assessment Standard — covering health and safety, environmental, quality, building safety, fairness and information security
- ✓ Independent accreditation — ISO 45001 or SSIP, ISO 14001 or EMAS, ISO 9001 or BS 99001, ISO 27001, ISO 19650-2
- ✓ Mandatory policies — social value, carbon reduction plan, mental health and wellbeing, and cyber security

HOW EACH SUPPLIER WON ITS PLACE

60% Quality 40% Price

QUALITY WAS ASSESSED ON

Social value and impact ✓ Project feasibility and risk management ✓ Health and safety ✓ Supply chain management ✓ Digital and innovation ✓ Training ✓ Marketing ✓ Project delivery ✓ Ability to deliver (Lot 1 & Lot 10) ✓ Lot 8 contractors ability to deliver nuclear and defence projects

How we manage suppliers for you

The biggest risk with any framework is silence — you go to market and nobody bids. We manage that risk actively on your behalf, with performance targets that suppliers have to meet.

50%

minimum response rate to expressions of interest (40% for Lot 1)

80%

of positive responses must go on to be tendered (70% for Lot 1)

3 months

suppliers who miss targets twice may be rested, with a reserve promoted

WHAT WE DO BEHIND THE SCENES

- ✓ A named manager for every supplier, with authority to act
- ✓ At least two performance review meetings a year
- ✓ Monthly management information for every supplier
- ✓ Clear dispute resolution and escalation routes

WHAT WE MEASURE EVERY QUARTER

- ✓ Client satisfaction, surveyed during and after your project
- ✓ Social value delivered, project by project
- ✓ Response and tender rates against the targets above
- ✓ Collaboration and continuous improvement

Forms of contract

Contract forms that fit how you already work.

Civil Engineering, Infrastructure and Enabling Works 2026 supports the standard forms used across public sector construction, so you can use the framework without changing your contracting approach. Every call-off is based on your own scope and requirements.

DEMOLITION ON FORMER FENLAND FOODS SITE | DEMOLITION & LAND
REMEDiation FRAMEWORK
South Kesteven District Council | Cawarden

AMENDMENTS

Allowed for project-specific needs, provided core terms are not substantially altered. Direct Appointments: per s74 PA23.

EARLIER FORMS

Earlier JCT forms (e.g. JCT2016) are permitted. JCT2024 rates in the Pricing Schedule then apply.

ECI AND THE PSA

Two-stage ECI: use a PCSA under Schedule 11. NEC PSC/PSSC or JCT PCSA also allowed, amended as required.

Projects that make a difference

Civil Engineering, Infrastructure and Enabling Works 2026 is a second generation framework which combines both our civils and demolition offerings. In that time, the frameworks have delivered highways, bridges, public realm, treatment works, demolition and remediation projects. In total, over £840m has been enabled through our civils and enabling works solutions.

ENABLING WORKS

Demolition and site stabilisation enables future growth

The project for Rugby Borough Council involves the demolition of two residential properties and detached garages, with both sites fully cleared and ground levels reinstated following completion.

CIVILS

Transforming Torbay waterfront

Torbay Council has delivered a major transformation of The Strand, creating a high-quality public space that enhances one of the town's most iconic waterfront locations while prioritising pedestrians and improving the visitor experience.

CIVILS

Transforming the A133 Clingoe Hill Corridor, Colchester

The Corridor is a vital link for thousands of students, residents and commuters, as well as an enabler for future rapid transport solutions in the region.

Talk to us about your project.

Our procurement specialists will help you find the right route — and shape the project from the very start.
